OUR ENVIRONMENTAL PRODUCT DECLARATION

In order for environmental product balance sheets to be meaningful, they must be objectively comparable. So to let our customers easily understand and contrast our lifecycle analyses and environmental product data with those of other materials, we have firmly committed ourselves to a policy of total product transparency. We openly and voluntarily communicate the ecological balance sheets of our wood-based products in our Environmental Product Declarations (EPDs). Each EPD is issued by the Institute Construction and Environment e.V (IBU) in a format which was developed on the basis of internationally valid ISO standards in close collaboration with building and environmental authorities in Germany.

ONLINE FLOOR STUDIO

Experience the effect of differing woods, ornamentation, wall and furniture colours in an accurate representation of any room. The online floor studio is the ultimate tool for both end user and salesman.

INSTALLATION

Unlike parquet flooring, there is no reason not to install laminate yourself. And as KRONOTEX is clic-together flooring, laying it is quite easy, even for inexperienced DIYers. Thomas shows you how to install in six steps.
